SURROGACY MATERNITY – JUSTIFICATION OR LACK THEREOF OF REGULATING IT IN THE FUTURE LAW ON MEDICALLY ASSISTED FERTILIZATION IN BOSNIA AND HERZEGOVINA

SUMMARY: The focal point of this paper is the review of the possibility of introducing some forms of surrogacy maternity in the legislative framework of Bosnia and Herzegovina, by honoring, among all else, the values of our society and the best interest of the child to be conceived and born in this way. The work also presents a comparative examination of legislative solutions of individual countries in which this method of infertility curing is allowed or strictly forbidden, all done with the goal of finding the appropriate model for a solution of the legal framework suitable for its implementation in the legislative framework of Bosnia and Herzegovina.

KEY WORDS: *surrogate maternity, medically assisted fertilization, surrogacy agreement, genetic mother, gestation mother.*
