JUDGMENT ENFORCEMENT PROCEDURE RELATED TO THE RIGHT TO ANNUITIES

ABSTRACT: The paper deals with the specifics of judgment enforcement procedure related to the right to compensation for future damages - the right to annuities or rent. Annuities involve monetary compensation which is awarded for damage caused by death of care providers as well as for damages caused by bodily injury or damaged health. The judgment enforcement involves the payment of future damages in terms of stipulated monetary sums. Annuities rank as priority claims by the Law on Enforcement and Security Proceedings. In accordance with the law, the court issues an execution order to collect rent, and the public enforcement officers have the authority to carry out the execution procedure. The new Law on Enforcement and Security Proceedings seeks to improve the enforcement procedure, through the introduction of new legal profession - public enforcement officers, and increase the efficiency of judgment enforcement process regarding the right to annuities.

KEY WORDS: annuities, enforcement procedure.
